

# INTELLIGENT CLOUD MIGRATION

## WORKSHOP

Spend a day understanding various approaches to moving workloads to the Cloud, determine your cloud readiness, develop a preliminary strategy for your journey to the Cloud – through Kanda's interactive workshop.

In this workshop Kanda will touch upon all aspects of intelligent cloud migration and guide you through a full spectrum of considerations to accomplish it successfully: from understanding different approaches of building applications in the cloud to assessment and planning.

Kanda Cloud Experts will help you understand the exact level of effort, risk, and process changes needed to plan, deploy, and manage a cloud environment for your organization. The workshop will be tailored to address a combination of cloud readiness assessment, migration planning and design, and cloud delivery and operations considerations.

At the end of the workshop you will have a high-level migration strategy that is tailored to your business and technical requirements and objectives.

### The workshop is designed to guide you through the following questions:

- › How can GCP address your business requirements?
- › What would be the best approach of moving to the GCP?
- › What tools and techniques can help make better decisions about workloads?
- › What tools and techniques will make the move as seamless and efficient as possible?
- › What are the potential risks and how to mitigate them?
- › How can Kanda help?
- › And more...

## Attendees

We recommend starting with a group consisting of management/leadership team together with respected subject matter experts. For example:

- › Software and DevOps Engineers
- › Configuration/Build Engineers
- › Management/Leaders
- › Product Management/Ownership

## Workshop Agenda

- › Introductions
- › Cloud Migration Strategies  
(review best Cloud Migration and Management models, understand how Cloud can help address not only technical, but also business needs)
- › Technical and Business Discovery:
  - › Discuss company's business drivers and objectives
  - › Discuss business and technical requirements
  - › Discuss existing infrastructure, applications and cloud initiatives
- › Identify Cloud architecture options that best meet your business and technical requirements.
- › Define a high-level Cloud Migration strategy (pre-requisites, expected timeline, actionable items)
- › Strategy and Implementation Recommendations

## Deliverables (provided post-workshop)

- › Summary presentation of findings, outcomes, recommendation and next steps
- › Statement of Work for Cloud Assessment or Migration initiatives

## About Kanda

Kanda is a premier full-service Software Development, QA, Cloud and DevOps partner, specializing in the development and support of time-sensitive and innovative SaaS, mobile and on-premises solutions. At Kanda, we are uniquely positioned to help clients achieve benefits of digital transformation faster by complementing their Cloud initiatives with skilled and flexible DevOps teams who make product development and delivery fast and seamless.
